Altalink Management Ltd. <i>(please see note below)</i>	<u>2,400.00</u>	
Total Surface Lease Revenue		\$11,796.00

***NOTE PERTAINING TO PARCEL 1 AND 2-** Reclamation has been completed on all but 2 structures as the said structures require a water act approval. Altalink Management Ltd. ("Altalink") anticipates receiving those water act approvals in late 2019 and followed by reclamation on those structures which should commence shortly after spring break up. Reclamation on each structure location typically takes 1-2 days once they are able to get to the site.

Though reclamation may be completed it is still not clear how the Government will issue reclamation certificates as they do not have a procedure to issue reclamation certificates for electrical transmission lines. Altalink is engaged with the Government to try and determine a procedure for this however it is a very slow process.

With that being said, if the land owner wishes to develop on the land where Altalink's transmission line was then Altalink is willing to work with them in order for them to achieve their desired development. Altalink has already worked with a few and have signed off on non-objection letters provided to them by the developer in order for them to supply our non-objection to the local authority.
